Important Information Regarding Fracture Care Medicaid Referrals

Effective immediately referral requests related to fracture care, **specifically where casting is performed**, will be issued up to 7 days post service. PCPs should either fax or phone in these requests – the Provider Portal cannot be utilized in these cases. **The diagnosis code on the referral request must reflect fracture to qualify.**

Please Note: Home State will allow up to 7 days post service to obtain a referral only for fracture care when initial casting is performed. A referral is still required for reimbursement.
